

## Pioneering Stage 2 Assessment

Scout: \_\_\_\_\_

Section: \_\_\_\_\_

Assessor: \_\_\_\_\_

Date: \_\_\_\_\_

**I know how to get help if someone is hurt**

The Scout needs to show an ability to recognize that someone is hurt and needs help. The Scout should also know how to get help and by what means. How to recognise that some is hurt. How to compare injured parts with uninjured parts. Methods of getting help. Methods of caring for someone that is hurt.

**I can tie the basic knots I need for pioneering**

The Scout should be able to tie under supervision and use: clove hitch, reef knot, square lashing, tripod lashing, diagonal and sheer lashing.

**I can prepare ropes for use in pioneering**

The Scout needs to be observed doing or assisting others in selecting ropes for a pioneering project. (Reference Scouting Trail Pages 178)

**I can coil a rope**

The Scout should be able to coil a rope so it will not twist or curl. (Underarm coiling should not be encouraged as it causes the rope to twist and curl). The Scout should also be able to 'finish' off the end of the coil so it can be carried and stored.

**I can undertake tasks assigned to me while we are pioneering**

The Scout needs to be observed in action over a number of a pioneering project

**I have made a knot board**

The Scout will have made a simple knot board for his/her lodge/six/patrol corner. The knot board should display at least six basic knots of their choice.

**I have built at least three simple pioneering gadgets using elastic and techniques**

The Scout should have participated in the construction of at least three simple pioneering gadgets perhaps constructed on a camping adventure or as part of a pioneering activity. The Scout should be showing a progression of skills in the construction of these simple projects.
